

Mechanical Engineering Department :

Mechanical Engineering is the most popular course where students learn about manufacturing processes, Machines, Mechanisms, Engines, Automobiles, Refrigeration & Air-conditioning. All industries and Government Departments need mechanical engineers for manufacturing operations, maintenance of equipment, planning, designing etc.

The Department has highly qualified and experienced team of staff members. It has well equipped laboratories like Metrology and Quality Control Laboratory, Thermal Engineering Laboratory, Theory of Machines Laboratory, Hydraulics Laboratory. A students organization MESA is active in the Department to keep the students informed about current trends in Technology and organizing Extra Curricular Events.
